

FIRE LANES AND RESTRICTED PARKING AREAS

New fire lane signs have been posted in addition to those that were already in place around the different fire lanes that run through our campus to alert drivers of these no parking areas. Other signs that were posted in the past alerted drivers to pedestrian walking areas and reduced speed limits. (Please obey the reduced speed signs in these areas while driving golf carts, and gators also – pedestrians always have the right of way- **at least 3-feet**).

KEEP A FURTHER DISTANCE FROM BICYCLISTS AND PEDESTRIANS.

All campus fire lanes must be clear of parked vehicles, there is an exception for facilities operations service vehicles for short periods of time when performing building and equipment related tasks.

By keeping ENTRANCES, and FIRE LANES CLEAR and ACCESSIBLE we will provide the REQUIRED ACCESS for EMERGENCY RESPONDERS.

Vehicles parked for hours in a no parking fire lane in front of Memorial Hall and the LU Wellness Center.

All campus fire lanes must be clear of parked vehicles, there is an **exception for facilities operations service vehicles for short periods of time** when performing building and equipment related tasks.

All personal vehicles must park in the designated parking lots or on the street parking spots on campus.

The Appleton Fire Department also drives around our campus to make sure that these areas are not being used for parking areas. We have received picture of this inspection and have also warned contractors about parking in these areas and blocking access to building standpipe connections. (For example, the fire lane located by the south lower entrance doors to the Warch Campus Center). Also keep areas clear and accessible around fire hydrants, making it is easy access the connections.

Attached image from inspection by Battalion Chief Henson, the email was about contractors and others parking in fire lanes around campus October 16, 2023.

I am creating this reminder in response to his concern about the amount vehicles parking in fire lanes. I will be conducting daily inspections of fire lanes around the Lawrence University campus, and documenting vehicles that are parking in fire lanes. If you have any questions about no parking in fire lanes and building accessibility on our campus, please contact me at mark.musser@lawrence.edu.
